BIENNIAL REPORT OF THE TRUSTEES

c. 3

OF THE

CALIFORNIA STATE LIBRARY

FOR THE

FIFTIETH AND FIFTY-FIRST FISCAL YEARS.

July 1, 1898, to June 30, 1900.

SACRAMENTO:

A. J. JOHNSTON, : : : : SUPERINTENDENT STATE PRINTING.
1900.

REPORT OF THE TRUSTEES OF THE CALIFORNIA STATE LIBRARY.

SACRAMENTO, CAL., June 30, 1900.

To his Excellency HENRY T. GAGE, *Governor of California :*

We have the honor of submitting to you our biennial report for the fiftieth and fifty-first fiscal years.

The accession of books to the Library since our last report is 6,642 volumes, without any losses to report, and the balance in our fund at this date (June 30, 1900) is \$11,488.65; an increase of \$2,518.77.

Through the courtesy of the Secretary of State, we obtained additional room in the Capitol Building. This relieved the cramped conditions which formerly existed in the Library. We have established a new Law Department; created a California Historical Department and Reference Room; introduced the more modern and comprehensive system of cataloguing, "The Dictionary System," in place of the formerly existing system which gave the names of authors only. This system we are now extending to cover the entire Library. We began the indexing of a file of California Newspaper Publications, which is now under way, and we have introduced a new and complete system of ordering and purchasing books.

The report of the State Librarian is herewith presented and made a part of this report. It is full and comprehensive, and contains an itemized statement of our monthly receipts and expenditures. The changes and improvements made in the Library are explained and set forth in detail by him. We indorse his recommendations, and especially do we commend his careful attention to duty and his efforts to improve and enlarge the scope and usefulness of the Library.

Respectfully submitted.

FRANK D. RYAN,

President of Board.

ALLEN B. LEMMON.

BRADNER W. LEE.

THOS. FLINT.

W. C. VAN FLEET.

REPORT OF THE LIBRARIAN.

To the Honorable Board of Trustees of the California State Library:

GENTLEMEN: I have the honor of submitting my report for the fiftieth and fifty-first fiscal years, which embraces the transactions of the State Library for the period mentioned, ending June 30, 1900.

Hon. Frank L. Coombs, my predecessor in the office of State Librarian, served the first nine months of the fiftieth fiscal year, or until April 1, 1899, at which time he resigned and I was elected to succeed him.

On assuming the duties of Librarian, I made a number of recommendations regarding general facilities, utilities, and service, the carrying out of which has been made possible by the approval of your Honorable Board, to the great improvement of the Library and to the convenience and comfort of the public.

In this report you will find a brief statement of the condition of each department, with an explanation of the work done in accordance with your recommendations and sanction.

FINANCES.

The finances of the library are in a most satisfactory condition, ample and sufficient to guarantee the fulfillment of every immediate need.

When the present Board assumed control of the Library affairs, on February 28, 1898, there was a balance of \$6,061.77 turned over to them by their predecessors. On June 30, 1900, the amount on hand was \$11,488.65, showing an increase of \$5,426.88.

Notwithstanding the most unusual demands upon the fund and the extraordinary expense incurred in establishing new quarters for the Law Department, the cost attending its removal, and the rearrangements and changes made in the Medical and Newspaper Room, to which reference is made hereafter, the Library Fund has suffered no impairment, as the following general statement of the two fiscal years covered by this report will show:

Balance on hand July 1, 1898.....	\$8,969 88	
Amount received during the fiftieth and fifty-first fiscal years	55,867 70	\$64,837 58
Expenditures during the fiftieth and fifty-first fiscal years.....	53,348 93	
Balance June 30, 1900.....		\$11,488 65
Amount of increase during the fiftieth and fifty-first fiscal years..		\$2,518 77

A statement in detail is included in this report, showing all the items of the above expenditures.

BOOKS.

On June 30, 1898, the State Library contained 107,000 volumes. On June 30, 1900, our accession book showed the number to be 113,651, an increase of 6,642 volumes, divided as follows:

By purchase	3,801 vols.
By subscription.....	1,003 vols.
By exchange.....	762 vols.
By donation	1,076 vols.
	<hr/> 6,642 vols.

In our purchases, we have endeavored to use a wise discrimination, having subscribed for all publications of recent date on subjects contained in the Library, as well as securing the latest editions on classes of books which heretofore had not been placed upon our shelves.

The Bulletin issued by the Library will show the purchases made during the past year, and future copies will keep those interested in the Library advised as to its contents and subsequent accessions.

The books designated as having been received by subscription are the periodicals and newspapers subscribed for by the Library and which are accessioned only after the volumes are completed and bound.

The exchanges include publications from the different States and libraries with which we have established a system of exchange.

The donations consist of publications of all kinds, including periodicals and newspapers donated to the Library, which have been bound and accessioned.

SYSTEM OF RECORDS.

That a complete and systematic record of all transactions pertaining to the purchase of books might be secured, the routine work has been so changed as to meet the new conditions and regulations now prevailing in the management of the Library.

In ordering books, we have adopted a very simple and comprehensive plan. On a card specially designed, the number of the order appears, the date of the same, from whom ordered, when received and shelved, together with a description of the volume or volumes, showing the approval of the purchase, price, place of publication, edition, and date. It is then copied in the order book and the cards filed away for future reference. Thus, we have a perfect and complete record of the transactions involving the purchase of each book.

A similar plan has been adopted and followed out in each Department.

The inventory of 1898 shows that out of the 108,000 volumes described, there were 4,402 missing, with no explanation of the cause leading up to such loss. While no satisfactory information tending to the recovery of these books may ever be obtained, we have preserved what data we have at hand concerning them; and to guard against similar possibilities in the future we have opened a record which gives a description of each

missing book, cause of loss, and date of replacing the same, where such a course can be exacted. The figures given constitute the entire number of missing books in the Library since its creation, with no additional losses to be recorded during the period of the present administration.

BINDING AND PRINTING.

By reason of the closing of the State Printing Office for the forty-ninth and fiftieth fiscal years, the binding for the State Library accumulated to such an extent that when the Library appropriation for that purpose became available, July 1, 1899, there were over 2,000 volumes ready for the Bindery, divided as follows:

Periodicals.....	830 vols.
Newspapers.....	133 vols.
Miscellaneous.....	658 vols.
Supreme Court Records.....	447 vols.
Art works.....	41 vols.

The Legislature of 1899 appropriated for the fifty-first and fifty-second fiscal years, \$5,550, or \$2,775 for each year. In the fifty-first year the appropriation became exhausted, and in order to complete the work of binding, and so render the unbound volumes available to public use, it was decided to continue the work as far as possible, and pay for the same out of the Library Fund. This has been done, the extra expense amounting to \$2,406.50, and the accumulation is now all bound, accessioned, and placed on the shelves for general use.

REPAIRING BOOKS.

By reason of the expense attending the re-binding of all books sent to the State Bindery, irrespective of the conditions which would render a partial repair sufficient, we have established within the Library a department where books not entirely destroyed can be mended and restored to use, at a cost of about 68 cents per volume, against \$1.80 under the old system.

Since February, 1900, 300 volumes have been rendered virtually new in point of service, and in this manner we hope to keep the books of the Library in good condition at a nominal cost when compared to the price of re-binding.

DICTIONARY CATALOGUE.

For some time past, it has been apparent to both the patrons of the Library and the present administration that until some improved plan of cataloguing should be adopted, the efficiency of the Library would be greatly impaired.

The "Author Catalogue," which is in use here, was compiled by Librarian Wallis in 1889, and this was supplemented by Librarian McCabe in 1898. A catalogue which gives only the author of a book is most unsatisfactory, as it often happens that the author's name is not known.

The "Dictionary Catalogue," in general use, and accepted as the most comprehensive, convenient, and proper system of cataloguing libraries, and which gives the author, title, and subject of books, was recommended by my predecessor in his report for the forty-eighth and forty-ninth fiscal years, but to be applied only to the cataloguing of *new* books.

Upon my recommendation, your Honorable Board authorized the extension of that system until it covered the entire Library, and directed the employment of a sufficient force to bring about its completion.

I have to report that the work of preparing the shelf-lists, which is necessary before the actual work of making the cards commences, has progressed satisfactorily. All the books on the main and second floors have been re-classified, labeled, and shelf-listed, and we are now working in the History Gallery, and have only the Medical and Sociological Departments unfinished. When this is done, the preparing of the cards will commence. It will require some time to complete this task, but its value to the Library is of the utmost importance, and is directly in line with the work being done in the Library of Congress, where the conditions respecting a catalogue are almost identical.

NEWSPAPER DEPARTMENT.

In the recognition of a vast and profitable source of information, obscured and made useless by a lack of system, which would give a ready reference to the newspaper publications of California, the recommendation was made suggesting the advisability of indexing a file of California newspapers.

Having been directed to proceed, I have the honor and satisfaction of reporting the successful inauguration of the work. Under the designation of

CALIFORNIA HISTORICAL DEPARTMENT,

we are now proceeding to the fulfillment of this most important task. At present, this Department contains about 1,000 bound volumes, 1,400 pamphlets, and 1,700 volumes of California newspapers. The California books and pamphlets have been catalogued and placed in the Reference Room, where they can be easily consulted, and every endeavor will be made to secure all publications that will be of value to this Department.

The newspapers have been placed in a room specially prepared, and the work of indexing a file of them has been commenced. It was taken up with the "Californian," published in Monterey, August 15, 1846. Following it came the "California Star," and then the "Alta California," which is indexed up to January, 1858. This work will be so broadened as to include a newspaper from the northern part of the State and also one from the South. The importance of this undertaking is being appreciated, and several of the States have begun a similar task. It

was inaugurated by the Massachusetts State Library in 1892, where they index "Current Events" relating to matters of historical, political, and personal interest to Massachusetts. They have not, however, gone back to the early publications for the purpose of throwing open to the public the historical information contained therein.

The object of the system adopted in the California State Library is to make a card-index of California papers for the exclusive use of this Library and without any intention of having it published. The Library, having the files of the papers and the index to the same, will be ready to furnish information upon request from the people of the State.

LIBRARY BULLETINS.

In adopting the custom made universal by its general use in all large libraries, a bulletin is now issued by this Library showing all recent accessions, and occasionally including some special class, or books upon some particular subject, thus keeping those interested in the Library advised as to its contents up to the date of the last bulletin issued.

A system of exchange with other libraries has been adopted, which gives to all a complete knowledge and comprehension of library growth and development throughout the United States.

The first bulletin issued by this Library was for September and October, 1899, and up to the present date there have been four publications, the last one containing, in addition to recent accessions, a catalogue of works on Genealogy and American Local History.

LOANING OF BOOKS.

The original design and creation of the State Library did not contemplate a field of usefulness beyond the immediate needs and requirements of the State Government and of the Legislature during its sessions. It was not intended that the books should be circulated, but held in the Library for reference.

The plan has been somewhat broadened in extending to the members of the bar of every county in California the use of the books in the Law Department. A Superior Judge of any court in the State may, upon application, withdraw books from the Law Department for a period of two weeks, the only exaction being the payment of cost of transmission and the prompt return within the time limited. Through such a medium, it is possible for the legal fraternity throughout the State to render the Library particularly useful in the practice of their profession.

Following out that idea, it would be a great advantage to the people of California if some plan could be devised whereby they might, under certain restrictions, have the use of the books collected in the General Department of the State Library. Librarians Perkins and Coombs have, in previous reports, recommended a system of this kind for the purpose of broadening the use of the Library, and in 1899 a bill was

introduced permitting other libraries in the State to withdraw books from the State Library for a period of two weeks, the expense of transmission being borne by the borrowing library. The measure, however, failed to become a law.

The plan has been adopted by the New York and New Hampshire State Libraries, and they report the complete success of the venture. It cannot, however, be done in this State until a proper catalogue has been compiled for the use of the borrowing libraries. It will be impossible to accomplish this work in time for the next session of the Legislature, but when it is completed, a system similar to that adopted by the States referred to would result in placing the information contained in the State Library in the hands of the people of this State, as well as within the reach of those for whom it was originally intended.

IMPROVEMENTS.

In conforming to the changes made by transferring the various departments to new quarters, it became necessary to make many improvements, repairs, alterations, and renovations.

The Office has been papered and decorated and the vault fitted with steel filing-cases for the preservation of account books, vouchers, and other valuable documents. New carpets, chairs, and tables have been purchased where necessary, and a general improvement in equipment in every detail has been accomplished.

The heating system of the Library has also been improved. Formerly there was no means of warming the Newspaper Room and the Office save by a grate. The Political Room was located on the Senate Chamber circuit, so that in order to warm that room the Senate Chamber had to be heated. These defects were remedied by placing radiators in the Newspaper Room and Office, and putting them all on one circuit.

A system of telephonic communication has been established between the departments, which is inexpensive and at the same time a great convenience and saver of time.

The attic has been wired for electric lights, and the book space greatly increased by the placing of additional stacks in order to accommodate the State and Government documents.

NEW LAW DEPARTMENT.

Owing to the rapid growth of the Law Department in the State Library, the room originally used for that purpose became totally inadequate several years ago to accommodate the accumulation of books. In order to remedy this matter, permission was obtained from Secretary of State, Hon. Charles F. Curry, and the members of the Supreme Court, to use the room directly under the General Department for a new Law Department, and the work of converting it into convenient and appro-

priate quarters was immediately commenced. The work was completed about the 1st of July, 1900, and the books were moved into the new room, which will easily accommodate 20,000 volumes, and can be made, when necessary, to hold some 5,000 more. This will give the Law Department room to grow for the next four or five years.

The cost of these improvements will be in the neighborhood of \$8,000, which sum was paid out of the Library Fund, and covers all the labor and material, as well as furniture and carpets.

OTHER ALTERATIONS AND CHANGES.

By reason of the changes above referred to, the following alterations and improvements have been made in the General Department, where the Library was in need of more space:

The room formerly used as a Law Department has been made into a Reference and Reading Room. The change consists in making pigeon-holes for newspapers and periodicals in the under cupboards, and placing doors with locks on a portion of the wall space, in order that the valuable books may be kept under lock and key. This arrangement gives every class an opportunity to expand, and by placing those books most frequently called for in this room, it will enable us to more readily attend to the wants of the patrons of the Library.

The gallery of the Political Room was left vacant when the Law books were removed. It is now fitted up with sliding doors, and the Medical Department placed therein.

The apartment formerly occupied by bound volumes of newspapers and medical books has been converted into a Newspaper Room, to the exclusion of all other matter. The present arrangement of shelves, tables, and chairs will make it a most convenient and comfortable working and reference room.

The improvements made during this administration, and which I have briefly outlined in this report, were imperative if the Library was to be kept in a condition commensurate with its importance and the large amount of money expended in its collection. In making these changes, every effort has been put forth to have the work done economically, and I feel that all who may take interest enough to investigate the work in detail will approve of the action taken by your Honorable Board.

Respectfully submitted.

J. L. GILLIS,
Librarian.

SACRAMENTO, CAL., June 30, 1900.
